

## II. Amendments to the Claims

This listing of claims replaces without prejudice all prior versions, and listings, of claims in the application:

### Listing of Claims:

---

Claim 1 (Currently Amended) A balloon dilation catheter comprising:

a tubular member having a proximal end and a distal end;

As an inflatable balloon disposed at the distal end of the tubular member;

a first lumen disposed in the tubular member and in communication with an interior of the inflatable balloon;

a second lumen disposed in the tubular member for receiving a guidewire along at least a portion of its length, the second lumen having a first opening in the proximal region of the tubular member and a second opening at the distal region of the tubular member; and

a first slit disposed longitudinally in the tubular member and extending along at least a portion of the tubular member, the first slit comprising a first pair of

longitudinal edges in a side by side relationship, the tubular member being constructed of a resilient material such that, as the guidewire is separated from the second lumen, the longitudinal edges are biased open from a first position to a second position having a gap greater than or equal a diameter of the guidewire

AS  
Sec. 2  
AS  
wherein the second lumen: (i) further comprises a second opening disposed between a distal end of the first slit and the inflatable balloon, and (ii) is circumferentially continuous in the region of the tubular member between the second opening and the inflatable balloon.

---

Claim 2 (Original) The balloon dilation catheter defined in claim 1, wherein, in the first position, the first pair of longitudinal edges are in an abutting relationship.

Cf  
Claim 3 (Currently Amended) The balloon dilation catheter defined in claim 1, wherein, in the first position, the ~~second~~ first pair of longitudinal edges are in spaced relationship, a space between the longitudinal edges being less than the diameter of the guidewire.

Claim 4 (Original) The balloon dilation catheter defined in claim 1, wherein the first slit extends from the first opening to the second opening.

Claim 5 (Original) The balloon dilation catheter defined in claim 1, further comprising an adapter attached to the proximal region of the tubular member.

Claim 6 (Original) The balloon dilation catheter defined in claim 5, wherein the adaptor comprises a valve comprising a second slit and third lumen for receiving the guidewire, the second lumen and the third lumen in communication with one another.

Claim 7 (Original) The balloon dilation catheter defined in claim 6, wherein the second slit comprises a second pair of longitudinal edges in a side by side relationship, the valve being constructed of a resilient material such that, as the guidewire is separated from the third lumen, the longitudinal edges are biased open from a first position to a second position having a gap greater than or equal a diameter of the guidewire.

Claim 8 (Original) The balloon dilation catheter defined in claim 7, wherein, in the first position, the second pair longitudinal edges are in an abutting relationship.

Claim 9 (Original) The balloon dilation catheter defined in claim 7, wherein, in the first position, the second pair of longitudinal edges are in spaced relationship, a space between the longitudinal edges being less than the diameter of the guidewire.

Claim 10 (Original) The balloon dilation catheter defined in claim 6, the first slit and the second slit are in substantial longitudinal alignment.

Claim 11 (Withdrawn).

Claim 12 (Withdrawn).

Claim 13 (Withdrawn).

Claim 14 (Original) The balloon dilation catheter defined in claim 1, wherein the first lumen and the second lumen each comprise a passageway having a substantially

circular cross-section disposed in a substantially solid tubular member.

Claim 15 (Original) The balloon dilation catheter defined in claim 1, wherein one of the first lumen and the second lumen comprises a passageway having a substantially circular shaped cross-section disposed in a substantially solid tubular member, and the other comprises a passageway having a substantially semi-circular shaped cross-section disposed in a substantially solid tubular member.

Claim 16 (Withdrawn).

Claim 17 (Original) The balloon dilation catheter defined in claim 1, wherein the first slit extends along a portion of the length of the tubular member.

Claim 18 (Cancelled).

97 Claim 19 (Currently Amended) The balloon dilation catheter defined in claim ~~18~~ 1, wherein the ~~guidewire port~~ second opening comprises a ramp to direct a proximal end of the guidewire through the ~~guidewire port~~ second opening as the guidewire is moved proximally in the second lumen.

Claim 20 (Original) A catheterization kit  
comprising:

a guide catheter;

a guide wire; and

the balloon dilation catheter defined in claim 1.

Claim 21 (Original) A stent-mounted balloon  
catheter comprising:

the balloon dilation catheter defined in claim 1  
and a stent mounted on the inflatable balloon of the  
catheter.

Claim 22 (Withdrawn).
